

**Prentice AM et al,**

**Critical Windows for Nutritional Interventions against Stunting**

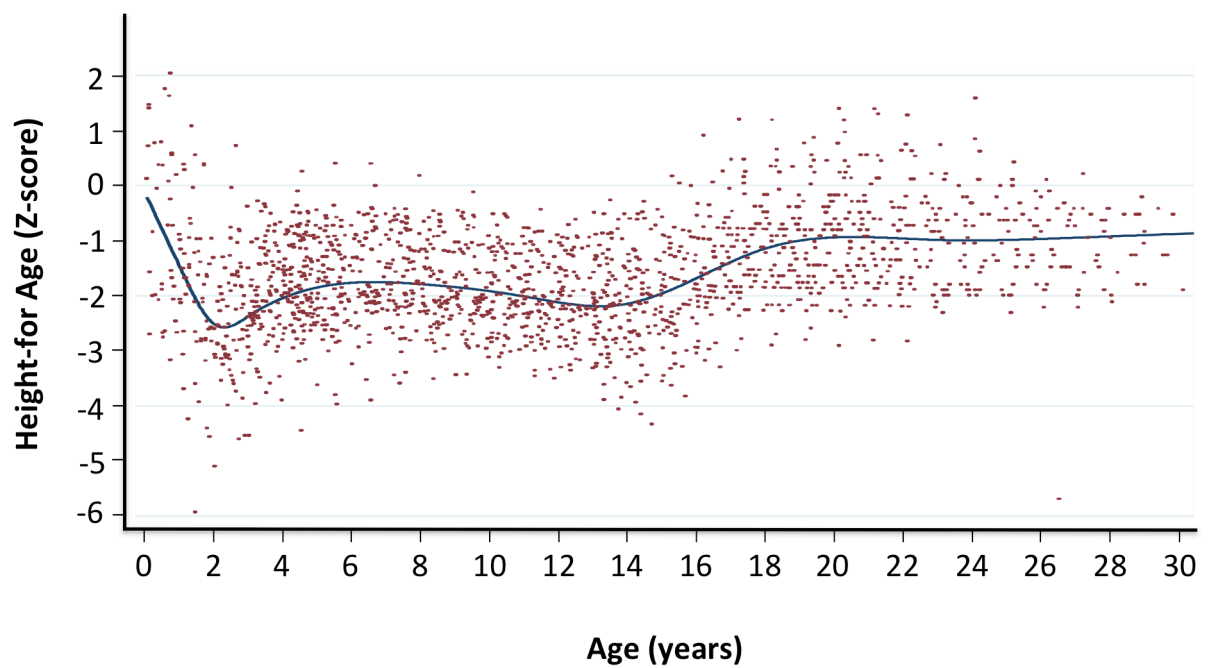

**Supplementary Figure 2**

Lowess-fitted curves applied to semi-longitudinal data on growth collected between 1951 and 2006 in rural Gambia ( $n = 36828$  data points). Height-for-age (first two graphs) and weight-for-age (last two graphs) Z-scores were calculated against the UK1990 reference (11). Data illustrated for people surviving beyond the age of 30y.
